

RICHLAWN FERTILIZER 7-2-1

Manufactured by:
 Richlawn Turf Food, LLC
 15121 WCR 32
 Platteville, CO 80651
 Net Weight 50 lbs
 (22.68 kg)

WITH MYCORRHIZAE

Richlawn 7-2-1 is pre-blended with specific Mycorrhizae native to the Western United States, making it a beneficial fungal biomass that adds microbial activity to depleted soils wherever this product is applied. Richlawn 7-2-1 with Mycorrhizae is a stable, slow-release nitrogen source which enhances establishment of native species of vegetation and shrubs based on long-term germination rates of these native types of vegetation. Richlawn contains beneficial bacterial and fungal biomass used to enhance topsoil building and restore depleted soils with organic matter. This creates a sustainable soil web for long-term vegetative establishment. All of Richlawn products are certified to be weed-free.

BENEFITS

- Mycorrhizae is a beneficial fungi that increases the effective rooting area of plants and enhances nutrient uptake
- Extended-release nutrients allow for fertilization over a longer period
- Increases soil porosity which promotes oxygen, water, and nutrient flow availability

GUARANTEED ANALYSIS

Total Nitrogen(N)	7.0%
• 6.07% Water Insoluble Nitrogen*	
• .93% Water Soluble Nitrogen	
Available Phosphate (P ₂ O ₅)	2.0%
Soluble Potash (K ₂ O)	1.0%
Calcium (Ca).....	6.0%

Plant Nutrient Sources: Dried Poultry Manure and Feather Meal

*6.07% Water Insoluble Nitrogen from Dried Poultry Manure and Feather Meal

Non-Plant Food Ingredients:

Humates.....	15.0%
Endo Mycorrhizae	30,000
Propagules	
• 7500 Propagules Glomus Mosseae	
• 7500 Propagules Glomus Entunicatum	
• 7500 Propagules Glomus Intradices	
• 7500 Propagules Glomus Aggregatum
